

HP Integral

Smart  Flow  Plus 
solutions to meet your needs

HP Integral

HP Integral

Smart  Flow  Plus 
solutions to meet your needs

HP Integral is an innovative **motor-drive integration** that combines a **PM (permanent magnet) synchronous motor with a VFD (Variable Frequency Drive)**, achieving very **High Efficiency** levels.

The motor range leverages both brushless servo motor and AC induction motor technologies, so enhancing the power density and allowing for significant **size and weight reductions up to 50%**.

The drive is fully integrated with the motor into a dedicated case, so granting a very compact design and further reducing overall dimensions and weight.

Several drive configurations are available to cover a wide range of industrial and commercial applications: **variable torque applications**, typically in HVAC, as well as **constant torque applications** like material handling, air compressors and vacuum pumps.

RANGE OVERVIEW

PRODUCT LINE	FEATURES	FRAME SIZE	TORQUE		MAIN APPLICATIONS
			CONSTANT	VARIABLE	
HP Integral	<ul style="list-style-type: none"> • Single-phase supply voltage • Easy-to-use built-in keypad as option 	71		✓	<ul style="list-style-type: none"> • HVAC
HP Integral Smart 	<ul style="list-style-type: none"> • Smart configuration • Suitable for most applications • Industrial, Pump & Fan modes 	90-112	✓	✓	<ul style="list-style-type: none"> • General Industrial • HVAC
HP Integral Flow 	<ul style="list-style-type: none"> • Dedicated control functions for HVAC • Innovative energy saving features • Flexible functionality 	90-112		✓	<ul style="list-style-type: none"> • Advanced HVAC
HP Integral Plus 	<ul style="list-style-type: none"> • Advanced configuration • Maximum performance, motor control • Built in PLC capability 	90-112	✓	✓	<ul style="list-style-type: none"> • Demanding Industrial • Compressors • Vacuum pumps • Material handling

SAVING ENERGY WITH HP INTEGRAL

Electric motors have a significant impact on the worldwide energy consumption:

→ **up to 75% in industrial application and 40% in commercial application***

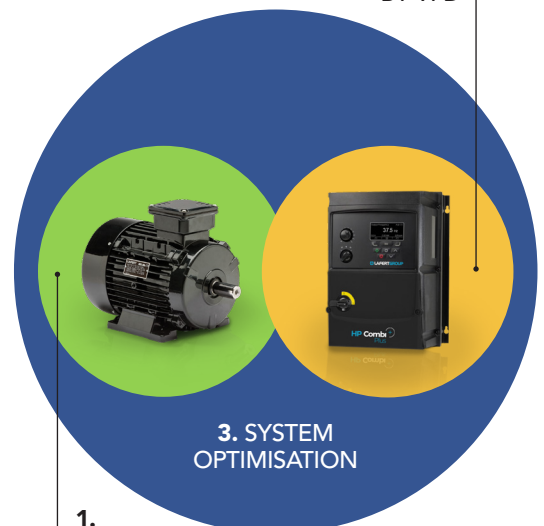

Today, a major factor influencing the motor industry is energy efficiency driven by both increasingly demanding legislation and the industry's

greater awareness of environmental responsibility.

Lafert embraces the challenge! With HP Integral, saving energy and reducing costs are possible with three easy steps:

- 1. INCREASED MOTOR EFFICIENCY**
- 2. SPEED CONTROL BY A VFD**
- 3. SYSTEM OPTIMISATION**

2. SPEED CONTROL BY VFD

1. INCREASED MOTOR EFFICIENCY

* Source: International Energy Agency

ADDED VALUES & BENEFITS

MOTOR-DRIVE SYSTEM FULLY DIMENSIONED AND CONFIGURED

according to customer needs

INCREASED SYSTEM EFFICIENCY & SHORT PAYBACK TIME

thanks to speed control and motor-drive optimisation

ADVANCED CONTROL ELECTRONICS

PC and mobile tools for easy commissioning, control and service

COMPACT DESIGN

thanks to the built-in drive

THREE MOTOR-DRIVE CONFIGURATIONS

to cover both variable and constant torque applications

ONE SINGLE SOURCE

for both motor and drive

STANDARDS & REGULATIONS

	EFFICIENCY TESTING METHOD	EFFICIENCY CLASSIFICATION	IE CODE						
			IEC STANDARD		EU MEPS	HP INTEGRAL			
MOTOR	IEC 60034-2-1	IEC 60034-30-2	IE1	IE2	IE3	IE4	IE5	IE3	IE5
VFD	IEC 61800-9-2:VFD Classification and testing		IE0	IE1	IE2			IE2	IE2
MOTOR + VFD	IEC 61800-9-2:VFD Classification and testing		IES0	IES1	IES2				IES2

1. INCREASED MOTOR EFFICIENCY

PM (permanent magnet) Synchronous Motors offer improved electrical efficiency when compared to traditional AC motors, achieving **IE4 and IE5 efficiency levels**.

PM technology benefits:

- **HIGH EFFICIENCY ACROSS A WIDE RANGE OF OPERATING SPEEDS**
- **EXCELLENT POWER DENSITY AND TORQUE CAPABILITY**

2. SPEED CONTROL BY VFD

A Variable Frequency Drive (VFD) is used to adjust the speed and torque of motor according to the variable demand of an application.

This results in a **relevant decrease in energy consumption** that leads to a **remarkable improvement in overall process efficiency**.

70% of applications are suitable for speed control. Typical variable torque applications, like **fans, compressors and pumps**, will benefit considerably from speed control:

SPEED REDUCTION OF 20% RESULTS IN UP TO 50% ENERGY REDUCTION

3. SYSTEM OPTIMISATION

The motor-drive system is **fully dimensioned and configured in accordance with the application's needs** and the customer's requirements.

Each motor-drive system is unique and designed for the purpose.

This results in a **PLUG & PLAY solution**, with a wide range of optimised motor-drive configurations for **fast set-up and easy commissioning**.

One single source for both system's components, motor and drive, makes this possible!
